

Lumalite Lumacristle - 24v Lighting

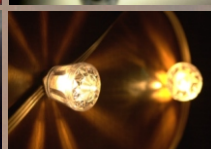

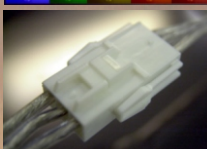

STANDARD LAMP SPACINGS :150MM, 330MM, 500MM AND 1000MM.

Rugged construction and stainless steel components ensure that Lumacristle is virtually indestructible UV stable Lumacristle can be used in adverse conditions i.e Marine use

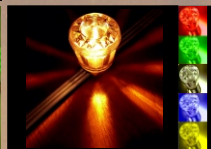

Lumacristle use wedge base 24volt filament lamps for a long life (2000 hours under normal conditions) with an economical replacement cost

Lumacristle lengths are easily connected together using the plugs and sockets which simply snap together

Lumacristle lenses are designed to disperse the light from the lamps outwards in the form of a star. They are screwed in to place to provide a secure fit and weather protection.

Lumacristle push on caps produce a pinpoint lighting effect, and are sealed with a rubber 'O' ring for a perfect fit

Five colours of Starlite lenses and Push-On Caps Available : Clear, Red, Green, Blue and Yellow

INSTALLATION

- * Lumacristle can be connected to any household 240 volt supply using a transformer.
- * Lumalite sell an internal / external 240-24volt transformer with 200va output. This transformer will run up to 60, 3-watt lamps over a fifteen metre length. Various other transformers are available from stock .
- * For commercial use Lumalite sales staff are happy to help you with ANY technical information when installing any amount of 2 or 3 wire 24 volt Lumacristle.
- * Lumacristle can be attached to buildings, trees, harbours, lampposts, bill-boards, signs, motifs, virtually anywhere where light is required!

LUMACRISTLE VARIETY

All Lumalite products carry the CE mark and conform to British Standard

- * Lumalite offer a selection of different forms of Lumacristle.
- * 2 and 3 wire cable is available in clear, green or brown.
- * Static, alternate flash or a true chase using a Lumalite controller
- * And don't forget the wide choice of interchangeable caps and Starlite lenses!
